

RAHUL BRAMHANKAR

Full Stack Developer

✉ rahulbramhankar04@gmail.com ☎ 7057167045 📍 Pune, India 🔗 [linkedin](#) 🐙 [github](#)

PROFILE

I'm a Computer Engineering student (2023–2027) who's been building real web apps since the early days of college. I work mostly with React, Node.js, Firebase, and REST APIs — both in freelance projects for actual clients and in hackathons where I helped ship a winning product. I care about writing clean code that works in production, not just in demos. Looking for a software engineering role where I can keep building and learning in a real team.

WORK EXPERIENCE

Freelance Full-Stack Developer | FinTaxVers.com – Financial & Tax Consultancy Platform Jan 2026 – Present [🔗](#)

Built and deployed a full-stack web application for financial and tax consultancy using React.js, Vite, and Firebase, reducing client onboarding time by ~30%. Implemented dynamic routing and SEO-optimised service pages using React Router, improving page discoverability. Designed responsive, accessible UI with tabbed navigation, improving user engagement across mobile and desktop. Integrated EmailJS and Firebase for automated contact and client inquiry workflows, cutting manual response effort significantly. Structured Firestore data for horizontal scalability, enabling easy addition of new service categories.

Freelance Full-Stack Developer | Unmatrix – Interior Estimator Platform Feb 2026 -Present | Pune

Developed a Shopify-style interior design platform featuring product listings, cart management, and quotation generation. Built a dynamic cost estimation engine based on user-selected requirements and design elements. Designed a RESTful backend and responsive frontend to support concurrent user sessions and scalable service listings. Delivered a complete agile development cycle from requirements gathering to production deployment.

Software Developer Intern | NextGenTech Feb 2026 – Jun 2026 | Pune

Contributed to full-stack feature development and code reviews within a professional agile engineering team. Worked on production-grade codebases using version control (Git/GitHub) and CI/CD deployment practices. Collaborated with senior engineers on sprint planning, task estimation, and iterative delivery.

PROJECTS

EcoBounty – AI-Based Environmental Reporting Platform

Winner - Techathon 3.0 | 500+ teams | 1,600+ participants | 24-hour build

Tech Stack: React.js, Node.js, Firebase, AI Verification APIs | Jan 2026. Built a community-driven full-stack web platform enabling users to report and track real-time environmental issues. Integrated AI-assisted verification APIs to validate user-submitted reports, reducing false submissions by an estimated 30%. Designed a reward and gamification system to drive community participation, achieving recognition at Techathon 3.0 (Best Solution Award). Deployed on Firebase with scalable NoSQL data architecture to support growing user base.

Temple Donation Management System

Tech Stack: MySQL, HTML, CSS, JavaScript | 2025. Built a full-stack web application for managing donation records, donor information, and transaction history. Designed a normalised relational database schema (MySQL) supporting efficient CRUD operations across multiple entities. Developed a clean, accessible frontend interface reducing data entry time for administrators.

AgriGuard – AI-Based Plant Disease Detection System

Tech: Python - PyTorch - Kaggle dataset - ML pipeline - Data preprocessing

Trained a PyTorch deep learning model on a Kaggle plant disease dataset to classify early-stage diseases from images. Built the complete ML pipeline from data preprocessing through model training to inference, automating disease triage without manual inspection.

SKILLS

Programming Languages — Java, JavaScript, HTML, CSS

Framework And Libraries — React.js, Node.js, REST APIs, Hibernate

Databases — MySQL, MongoDB, PostgreSQL

Cloud & Platforms — Firebase, Supabase, AWS (ML/SageMaker)

Tools — Git, GitHub, Postman, VS Code, Kaggle, Vite

Currently Exploring — Docker, Spring Boot, Solidity, Selenium

EDUCATION

B.E. – Computer Engineering | JSPM's BSIOTR, Pune
2023 – 2027 | CGPA: 8.6 / 10
HSC (12th) – Maharashtra State Board | Nutan Bharat Vidyalaya, Nagpur
2023 | Percentage: 91.5%
SSC (10th) – Maharashtra State Board | Saraswati Vidyalaya, Nagpur
2021 | Percentage: 85.8%

CERTIFICATES

Java & Data Structures and Algorithms (DSA) Internship – Talent Battle Pvt. Ltd. | 2025 — Completed intensive hands-on training in Java programming, OOP principles, and algorithmic problem solving
AWS Certified Machine Learning – Specialty (Exam Prep) – Udemy | 2025 — Covered ML pipelines, model training and deployment, Amazon SageMaker, and AWS AI/ML services

ACHIEVEMENTS

Best Solution Award – Techathon 3.0 (2026) | EcoBounty selected among top 5 finalists out of 400+ teams — awarded Best Solution in the competition
Certificate of Appreciation – Pandora Hackathon (2026) | AI for Smart Cities track — recognised for innovative solution design and technical execution
